

ET NAVSwarm Participation Contract

I understand in order to receive credit for my part in this capstone project, I must carry out the tasks that I am expected to do in a timely manner and with reasonable quality. If I am unable to carry out my tasks consistently or if my quality is consistently poor, the team reserves the right to hold a vote to decide if a “strike” should be placed against that person. If the first strike is applied, then the team leader will notify and have a discussion with that person. If a second strike is applied, the faculty advisor will be asked to step in and have a discussion with said person. If a third strike is applied you will be removed from the group, and will not receive credit for any participation that you may have had in the past with the team.
